Custom Clip Metadata

Custom Clip Metadata

When making requests to generate a clip or retrieve clips, you can specify additional metadata to be passed through the system to facilitate your own categorization of clips.

Passing Metadata on Clip Request

Here's a simple example to request a CS clip that contains partner specific metadata:

```
POST /cs/clip/potg HTTP/1.1
Host: prt.allstar.gg
X-API-Key: YOUR_API_KEY_HERE
Content-Type: application/json

{
  "demoUrl": "https://media.allstar.gg/static/sampledemo/003701
  "webhookUrl": "https://your-web.hook/allstargg",
  "metadata": [
    { "key": "category", "value": "tournament" },
    { "key": "division", "value": "III" },
    { "key": "round", "value": "4" },
  ]
}
```

Ensure your requests are made over HTTPS to comply with our security standards.

Retrieving Clips with Metadata

Once your clips have been processed, you can request all recent clips matching a specific set of your criteria based on the metadata you supplied via the create request. We expose a pattern for GET request parameters whereby you can specify a prefix of ``pmd_`` concatenated with the name of your metadata to add a search. E.g.

```
GET /cs/clips?pmd_category=tournament&pmd_division=III HTTP/1.1
Host: prt.allstar.gg
X-API-Key: YOUR_API_KEY_HERE
Content-Type: application/json
```

You can specify multiple values for the same parameter to effect an OR clause. E.g.

`https://prt.allstar.gg/cs/clips?

pmd_category=tournament&pmd_division=III&pmd_round=3&pmd_round=4` will result in a query to list all clips from rounds 3 and 4 for tournament clips in division III.

Please note, specifying only metadata as the selection criteria may impact response times. To ensure optimal performance, please consider using this feature as a means of additionally filtering clips (e.g. by user, by age, etc.).

API

Please refer to our [API Reference here](#) for additional searchable parameters on a per game endpoint (different games expose different search parameters).

Support

If you encounter any issues or have questions, please contact our support team at partners@allstar.gg.
